BenQ announces the MH530FHD-- a home entertainment projector featuring native 1080p (1920x1080) resolution, 3D capability, brightness reaching 3300 ANSI lumens and 15000:1 contrast ratio.

It also features 1.2x zoom, keystone correction and audio via built-in 2W speaker. Connectivity comes through dual HDMI inputs, and a Quick Install button instantly accesses installation-friendly features. Projected image size reaches up to 300-inch.

"This projector is the ideal choice for first-time projector buyers who'd like to enjoy big-screen entertainment affordably and hassle-free," the company says. "With the introduction of the MH530FHD projector, BenQ brings together the highest brightness and contrast at 1080p Full HD of any projector in its class and price point, giving users a beautiful picture no matter where they're watching their favorite feature or sports broadcast."
