Procella Audio launches its first power amp-- the DA-2800, spec'd to deliver a total of 2800 watts into 4 ohm loads.

It is rated at 700 watts-per channel into 4 ohm loads and 360 watts-per-channel into 8 ohm loads. One can also bridge channel pairs to produce 1400 watts at 8 ohms.

Two versions of the 4-channel amp are available-- with the DA-2800DSP adding onboard DSP for each channel (both versions carry an identical power amplifier).
