Procella adds to its speaker portfolio with the multitasking P6V-- a main and surround channel speaker in a tall profile enclosure.

The 2-way L/C/R and surround channel speaker includes a 1-inch high frequency compression driver (mounted on a constant directivity waveguide), a high-output 6.5-inch woofer and the so-called "Procella Identical Voice" crossover.

Designed for small- and medium-sized rooms, the P6V provides THX cinema reference-level playback (105dB continuous) and carries a bass extension meeting 80Hz THX subwoofer crossover point requirements.

Dynamic range playback is 24 bit/96KHz at reference level.

The P6V measures 47 x 29 x 12.5cm and is wall-mountable as either a surround speaker, main speaker (next to a flat-panel display) or behind an acoustically transparent screen.
