

Linn Intros Kiko Wireless Audio

Written by Marco Attard
07. 08. 2012

Kiko is the latest network-based audio system from Linn-- one with integrated with both an pre-amplifier and a power amplifier, offering 4 channels of 33W RMS.

It wirelessly receives virtually all audio formats from PCs or Macs using the Linn Songcast app, and streams internet radio, podcasts and "listen again" broadcasts. Wireless input also comes through Apple AirPlay, allowing users to also stream audio from compatible iOS and Mac devices.

Wired input comes through x7 different ports-- RCA line, 3.5mm, x3 HDMI, S/PDIF, TosLink and HDMI pass-through, sending audio to x2 connecting bookshelf-style speakers.

The Kiko is available now in 6 different colour.
