Amber International is the EMEA partner for Maine-based Terra Speakers, handling distribution of audio products such as the "All Climate" speaker range across the region.

BMB, the Amber International territorial distributor in Benelux, represents the Terra Speakers brand.

EMEA installers have access to 3 product ranges-- AC Series All Climate loudspeakers and subwoofers, CA Custom Application Series and LuminSound outdoor LED and lighting systems.

The purpose built "All Climate" loudspeakers are ideal for outdoor use, being able to withstand all weathering conditions while blending into outdoor surroundings.

Amber International now looks for residential CI distribution partners to take on Terra Speakers as well as its other brands.
