---

Tivoli launches a first with the Albergo-- a compact Bluetooth-equipped alarm clock radio featuring an AM/FM tuner with RDS, LCD display (for FM RDS text), alarm clock and stereo Bluetooth.

Wireless technology allows customers to pair the Albergo (Italian for "boutique hotel," by the way) with any Bluetooth-capable device for hassle-free audio streaming.

Further features include a sleep timer and an integrated auto-set clock for timekeeping even during power outages. The package includes a full-function remote, and an optional matching stereo speaker turns the Albergo into a tabletop stereo system.

"If your current music system features a dock or port that doesn't fit your Bluetooth enabled device, then you just purchased an obsolete product," Tivoli CEO Tom DeVesto says. "Just like our signature Tivoli Audio radios, the Albergo is designed to keep pace with ever-changing technology and is simple to use, with high-fidelity sound, and beautiful finishes."

The Albergo is available now in either white or graphite finishes.
