Genelec Home Audio launches the F active subwoofer series with the 6-inch F One and 8-inch F Two, both featuring all-metal construction hiding the drivers and connectors on the bottom, ensuring an undisturbed enclosure.

The woofers carry connections and bass management for up to 5.1 channels, and a comprehensive adjustment suite for matching to main loudspeakers (such as the G One) and room acoustics.

The F One pushes up to 98dB of sound with 35-85/120Hz (± 3 dB) frequency response and 40W of amplifier power, while the bigger F Two pushes 102dB with 150W of power.
