Extron enters the pendant speaker market with the SF 3PT-- an architecturally discrete loudspeaker aimed at high-ceiling and open-ceiling applications.

The SF 3PT features a 3-inch full-range driver for speech reinforcement and music playback. It includes a 6.1m PendantConnect speaker cable, an Extron development combining speaker wires and a steel safety cable within a single outer jacket for a clean and secure installation.

The UL-listed speaker offers both direct 8 ohm and 70/100V operation, and is voiced similarly to the Extron SF 3CT LP for sonic consistency in mixed ceiling environments.

The SF 3PT is available in black or white, and is paintable to fit with any decor.
