---

Parasound announces the NewClassic 200 Integrated Amplifier and DAC-- a device with all the preamp features of the NewClassic 200 Pre, plus the ability to drive high quality loudspeakers without need for a separate power amplifier.

Like the 200 Pre, the 200 Integrated includes analog bass management for optimal performance with compact satellite speakers and a powered subwoofer. The amplifier stage is the latest design from Pascal, a Danish company with expertise in class D engineering. The result is a slim 1U chassis packing 100W/channel RMS 8 ohms.

The two NewClassic products inherit features from the premium Parasound Halo product family, such as a Home Theatre Bypass function with adjustable 40-140Hz high-pass crossovers for the L and R outputs. Both 200 Integrated and 200 Pre generate full range and
