

SnapAV Releases Signature by Episode CI Speakers

Written by Marco Attard
20. 02. 2020

ISE 2020 has SnapAV announce Signature by Episode, a line of custom install speakers offering 32 models across three series, all with one and two-step installation options and seven optional cradle accessories.

Installers can pair the speakers with pre-construction brackets, back boxes and an assortment of grille options. Models in the Signature by Episode 3 series feature polypropylene woofers and silk dome tweeters for all-purpose performance, while models in the Signature 5 series are a step up with polypropylene woofers and adjustable silk dome tweeters, both with vacuum-deposited titanium for added performance. Signature 7 series models feature honeycomb fibreglass Nomex woofers and pure titanium tweeters for discerning listeners.

Crafted with premium components and tuned based on the sound principles of the National Research Council (NRC), Signature by Episode speakers promise lifelike sound with more bass extension, and the ability of louder, distortion-free playback. Signature by Episode also gives installers a tool-less speaker solution with Push Lock by Swarm technology securing in-wall and in-ceiling speakers with the simple push of a button. In the case of more challenging installations involving uneven sheetrock or popcorn ceilings, installers can cinch the dog ears an additional 6mm for a perfect fit.

SnapAV Releases Signature by Episode CI Speakers

“We’ve had tremendous enthusiasm for the new Signature by Episode line since it’s US debut in January. We’re thrilled to now be offering these solutions to our dealers worldwide,” SnapAV says. “Signature by Episode models are extremely versatile and easy to install, providing a truly life-like sound experience with deep bass and unmatched tonal clarity without interfering with the décor in any room.”

The Signature by Episode speaker series are available now.
