Yamaha announces the RX-V79 entry-level wireless AV receiver lineup, comprised of the 5.1-capable RX-V379 and RX-V479 together with the 7.2-capable RX-V579, RX-V679 and RX-V779.

All the receivers feature HDMI 2.0, 4k60p support and HDCP 2.2.

The RX-V379 is wireless via Bluetooth, while the RX-V479 also includes wifi connectivity. All support Airplay, Spotify Connect, DLNA and playback of WAV, FLAC, AIFF, ALAC and DSD audio files.

Wired connectivity comes through 4 HDMI inputs and 1 output.

Further features include YPAO-RSC auto calibration, virtual presence speaker (VPS) technology, virtual surround back speakers (VSBS), Dolby TrueHD and DTS-HD Master Audio decoding-- but no Dolby Atmos or DTS:X.
