

Acer Aspires for Multimedia Streaming

Written by Marco Attard

The Aspire RevoView is Acer's entry into the network media streamer market.

Connection is through HDMI port, and it integrates with surround speaker systems.

It plays content from either USB HDDs, an internal 3.5" HDD, memory card slot or the internet (YouTube, Picasa and Flickr only).

The HDD tray is shareable with Acer's Aspire M Series desktop PCs, and the device also acts as a USB external HDD.

Included is a 26-key remote control.
