

Home Technology Event Houses 3D Showcase

Written by Marco Attard
08. 06. 2011

This year's CEDIA Home Technology Event (HTE) will have 2 specially-built 3D theatres as part of its 3D Zone, showcasing JVC and Panasonic equipment.

Projectors on show will include Panasonic's D-ILA 3D range, which carries THX 3D certification-- the DLA-X3, DLA-X7 and DLA-X9, each hooked to Bowers & Wilkins surround audio systems.

Panasonic will exhibit its Life Size 3D screens, the VX200 and UX1 series, as well as its largest plasma display-- the monster 152" TH-152UX1, on its first UK event appearance.

Providing Panasonic with audio is AWE Europe, with Denon 3D blu-ray players and KEF speakers.
