

BitWise Controls will demo its home automation product portfolio at ISE 2014, including the BC1, BC2 and BC4 automation controllers, all controllable via either the recently launched [Room Remote](#) or iOS and Android apps.

The BC1 is a top-end shelf- or rack-mountable (via included rack ears) 1RU unit suitable for both residential and commercial applications. It handles audio/video, lighting, HVAC, shades and security system controls, with a built-in astronomical clock providing event scheduling according to time of day, sunrise or sunset.

Further features include 8 IR ports (routable and attenuable), 4 SPDT relays, analog or digital signal sensing capabilities, 2 USB ports and customisable email notifications.

Meanwhile the BC2 is the mid-size option, with 4 IR ports, 2 SPDT relays, 2 USB ports and analog or digital capabilities inside a compact chassis.

For single-room or expansion applications BitWise offers the BC4 controller. It features 1 RS232 port, 4 IR ports plus built-in blaster, 2 SPDT relays and 2-way interaction for a single device via serial or network connection.
