Key Digital's KD-VPHD3 video processor and KD-MSV8X8 video switcher can be easily configured with Control4's versatile devices, so the two formalize a partnership.

“Key Digital’s collaboration with Control4 enables the advantages of audio and video processing, switching and distribution through the whole home by Key Digital technology while providing home automation control and ease-of-use from Control4.” says Michael Lakhter, Key Digital’s VP Sales.
