Russound launches a new keypad design with the SLK (Single Line Keypad)-- providing individual zone control for your customers' C-Series MCA-C3 and MCA-C5 multiroom audio systems.

It includes a white backlit LCD panel with a 5-character display listing current source, volume level and system status information.

Users can also power the room's system on/off with a single soft-touch button, and even turn off all zones by holding down the power button for 4 seconds (just like with all Russound systems).

Available in x5 different colours, the keypad also features an IR receiver for direct control and IR repeating.
