Core Brands announces a new line of Elan Flush-Mount Wall Kits for the TP4, TP7 and gXP12 touchpanels, ideal for projects demanding a nearly-flush installation.

The Elan Wall Kits provide ease-of-installation, with a straightforward process the company says can be done in minutes. The Wall Kits for the 4- and 7-inch touchpanels are compatible with equivalent Niles and SpeakerCraft models, and each kit is available in either gloss white or gloss black for an elegant match with the touch panels.

“These retrofit Wall Kits make it simple to achieve that with an elegant finished look," Core Brands says. "They’re ideal in upgrade situations, saving time and money when replacing an older style touch screen-– such as ELAN’s TS or VIA! Series-– would have meant drywall and mud for a finished look.”

The Wall Kit line is as follows:

- XTP12RBKT-B Flush Mount Kit for 12” XP12 Touch Panel in Black
- XTP12RBKT-W Flush Mount Kit for 12” XP12 Touch Panel in White
- TP7RBKT-B Flush Mount Kit for 7” TP7 Touch Panel in Black
- TP7RBKT-W Flush Mount Kit for 7” TP7 Touch Panel in White
- TP4RBKT-B Flush Mount Kit for 4” TP4 Touch Panel in Black
- TP4RBKT-W Flush Mount Kit for 4” TP4 Touch Panel in White
