It's raining down iProducts and there's business in finding new ways to use the various iDevices. Sonance provide a set of in-wall iPod mounting solutions, starting with the iPort CM-IW100T. Thanks to various iPod apps, the iPort and iPod Touch transform into a touchscreen home control.

This unobtrusive mount not only houses an iPod but also delivers audio via Cat5 connection (up to 9m) to the nearest audio wall plate while keeping the deviced charged.

The mount allows wi-fi connection for the connected device.

This model is the first in an in-wall mounting series for both iPods and iPads.

Go iPort
