Extron introduces the **TLP Pro 525M 5-inch wall mount TouchLink Pro touchpanel**.

Re-designed inside and out, this latest TouchLink Pro touchpanel features a new, high-performance quad-core processor, 8X more memory, and an 800x480 capacitive touchscreen built with scratch and smudge-resistant edge-to-edge **Corning Gorilla Glass**.

The TLP Pro 525M also features the convenience of Power over Ethernet (PoE), allowing it to receive power and communication over a single Ethernet cable. It is suitable in any environment requiring a stylish, wall-mountable touchpanel with a fully-customizable control interface.

"This new TLP Pro 525M touchpanel satisfies customer requests for the same sleek design and edge-to-edge glass as our 7" model, but in a more compact size," says Casey Hall, VP Sales and Marketing for Extron. "Inside, you'll find the same enhanced processing power and memory; and of course we gave it super-tough Gorilla Glass to make sure it is as robust as it is stylish."

With its improved graphics engine, quad-core processor, and increased RAM, you'll see faster background graphic loads and crisper page flips with the TLP Pro 525M. These performance enhancements offer an enhanced user experience now, while providing ample memory and processing power to support exciting new features and capabilities in the future via firmware updates.

Extron Adds 5-inch Wall Mount Touchpanel with PoE

Three new mounting accessories, the **RWM 2 Recessed Wall Mount**, **SMK 2 Surface Mount Kit**, and the **RM5 Rack Mount kit**

all aid integration while providing a broad variety of mounting options.

All TouchLink Pro touchpanels can be customized using **Extron GUI Designer software** which offers ready-to-use templates for a wide variety of rooms and presentation environments.
