

iControl and uControl and whoControls?

Written by Marco Attard
07. 12. 2010

The 2 broadband home management companies, iControl networks and uControl, enter a definitive merger agreement.

No doubt who's in charge though-- not with "iControl Networks" as merged company name and uControl's Austin HQ to serve as division office.

The 2 companies' CEOs are to join forces as co-CEOs.

The combined company launches with serveral service providers and should announce additional deployments soon.
