Sanus starts shipping the FMS01 Furniture Mount System (aka FMS), a product allowing customers to benefit from a TV mount without having to drill holes in the wall.

Attaching directly to the back of compatible Sanus furniture, the FMS includes a built-in tilting mount for 32-60" TVs weighing up to 60kg.

One can also attach a variety of home theatre accessories and components to the back of the FMS pillar kit-- including wireless routers, surge protectors, wireless HD adapters, streaming devices, HDMI splitters, wireless speakers kits and a variety of furniture details.
