Sharp just started shipping its new 90" HDTV, the LC-90LE745U -- the world's largest LED TV. Specs include four HDMI 1.4 inputs, a VGA port, a component video port and a built in ATSC tuner. It's capable of 3D imaging, offers a refresh rate of 240Hz and has built-in Wi-Fi. The native 1920x1080p LCD has a full-array backlit LED with a specified contrast ratio of 8,000,000:1 and offers a 176-degree viewing angle.

Marketed as part of the AQUOS product line, it's a SmartTV with apps that include Facebook, Twitter, Netflix, HuluPlus and VUDU. It lists in USA for \$10,999.
