NBMI's Medialine 2000H is a 20" widescreen Combo LCD TV with a built in 160GB hard disk with PVR recording and built-in media player.

It features a standard built in DVBT/TDT/TNT digital terrestrial tuner. A recording schedule can be entered via the EPG with an 8-days ahead schedule with a max of 6 recordings.

Live recording is possible when watching a channel, just simply push the RED button on the remote and your TV immediately starts recording the current program.
