Sonos accessory maker Flexson launches three wall mount solutions for the [Playbar](#) , as well as a clever adaptor allowing customers to turn the Sonos take on soundbars into a speaker stand.

Reportedly the result of demand from both consumers and retailers, the Flexson TV Stand for Playbar is essentially a stainless steel case into which one can clip the soundbar before putting a TV on top.

It measures 90 x 30 x 8.7cm, supports TVs weighing up to 50kg and even provides cable management.

As mentioned earlier Flexson also offers 3 Playbar wall mount solutions-- the Cantilever Mount (supports TV and Playbar with adjustable viewing angles), the Screen Mount (fits existing VESA TV mounts) and the Flat to Wall Mount (a 12mm thin mount holding both Playbar and 37-55-inch TVs weighing up to 40kg).
