---

LG OLED TV efforts get literally doubled as the company launches 5 OLED TV models spanning 4 series (bringing to total of available LG OLED TVs to 10). The launch includes 4 UHD models and, in a first, a flat OLED TV.

So far all LG OLED TVs feature curved displays.

According to MK Business News the TVs come in 65- and 55-inch sizes and feature "Art Slim Design" for even slimmer profiles. In fact, one of the 55-inch models is all of 4.8mm thick.

The above mentioned TVs will first see release in LG's S. Korea before launch in European territories sometime in the near future.
