At **CEATEC 2015** in Japan, Sharp introduced **the first 8K TV ready for sales in both B2B and B2C markets**.

From November this year, the 85-inch **LV-85001** will sell at the impressive price of 117,000 Euro.

It's aimed at early customers for the 8K test transmissions by Japanese national broadcaster **NHK**.

They will begin broadcasting in 8K next year, with regular 8K service planned for 2018.

The TV set has 7680 x 4320 pixels and can be used in commercial applications both horizontally and vertically.
