Premier Mounts announces the Large Universal Tabletop Stand for Flat Panels (PSD-TTS-L)-- a successor to the PSD-TTS-B stand developed to easily mount large displays between 55-70-inch in size.

The PSD-TTS-L features adjustable mounting arms one can position anywhere along vertical poles for the best viewing height. It also has a wide base to provide stable support, and customers can bolt it on surfaces for added safety. The chrome poles also offer cable management for a clean and finished appearance.

The PSD-TTS-L ships as a complete tabletop solution, and includes the TTS-BASE-L, T40 poles and UFA low-profile mounting arms.
