Residential and commercial A/V furniture maker Salamander Design presents a design addition of C-Frame System-- Milan, a custom cabinet style with a future forward geometric 3D diamond pattern.

The C-Frame System is a selection of A/V cabinets blending art and technology able to fit with any decor. The Milan style is finished in gleaming white, and complemented by either black or white solid surface tops or black or brown glass tops. It is made using eco-friendly materials, engineered to perform and available in a variety of configurations.

Salamander Design offers the Milan style in 12-inch deep Low Profile Wall Mount Cabinets or 22-inch deep Credenzas ranging from single bay cabinets to four bays. Customers can also purchase Milan doors separately for swapping into an existing system.
