Nexus 21 launches the Model L-75ix-- a drop-down TV lift featuring 360-degree motorised swivel, making it an ideal solution for living spaces requiring multiple viewing angles from a drop-down TV.

"L-75ix is yet another Nexus 21 solution that allows our dealers to say "yes" to their customers," the company says. "They don't have to be held back by the orientation of a room or the constraints of construction. We wanted to give homeowners the flexibility in viewing angles, and professionals the power to make it a reality."

The mount carries TVs up to 75-inch, with maximum weight of 45kg. It extends downwards (with extension of 1.3m) in 15 seconds, with software taking care of both safety and collisions. It also offers a pair of customisable presents together with a home position.

The launch follows the rollout of IP control for all Nexus 21 products and the launch of the Apex Motorised TV Wall Mount, a purpose-built solution designed to fit completely inside the wall, with an installation profile of just 2cm.
