Dixons announces the Logik L23IPTV, a 23" LCD TV the retailer is selling as a home entertainment screen for the bedroom and kitchen category complete with smart TV functions.

Using Onyx browser technology from Oregan Networks, the L23IPTV has both home network and web connectivity with weather, news and social networking widgets and access to VoD services such as BBC iPlayer, Lovefilm and Blinkbox.

A touch sensitive control pad provides control, while the TV set also has in-built DVD and USB media players, PVR/TSR functionality and two 3W speakers.

Also joining the Logik series are a number of 3DTV models, with sizes ranging from 32" up to 47".
