

The Christie Lens Throw Distance Calculator

Written by Bob Snyder
02. 05. 2012

Christie launches the latest **lens throw distance calculator** with:

- 62 projectors, and now including calculations for the Christie M Series and Christie J Series
- Easy-to-use user-interface
- Built-in calculation of vertical and horizontal offsets with instant results
- Clear warnings if your calculations are outside of recommended limits
- A more detailed, printable, results page
- Online access, or downloadable version

Christie's throw distance calculator can determine the lens required for the installation of your Christie projector-- or the screen size or throw distance you will need given your current Christie projector and lens combination.
