

SI's Black Diamond from Texas

Written by Bob Snyder

SI's Black Diamond projector screen (that recently won a "Best of Demo Alley" during the EHX Spring 2008) is now shipping.

SI makes a lot of claims about their new technology for Black Diamond. Black Diamond screens supposedly eliminate the light scatter on the walls and ceiling (created by the projector), therefore lowering the unwanted washout and increasing the contrast. But judge yourself by watching their video.
