Stewart Filmscreen debuts Stewart Standard Solutions at CEDIA Expo 2015-- an initiative streamlining the selection process for the most popular screen systems from the company.

Installers also get financial benefits for choosing from the preset product menu.

The Standard Solutions product list includes one fixed wall screen (the Luxus Deluxe Quick Snap Wallscreen) and three motorised retractable Electriscreens (Luxus Model A Wall Mount, Visionary Slotted Ceiling Recessed and Stealth Trapdoor Ceiling Recessed). Each are offered with either FireHawk G4 or StudioTek 130 G3 screen material, and are outfitted with a Stewart Intelligent Motor Control system and a 3-button wall switch.

The company also offers an IR remote, RS232 and ethernet packages as upgrade options.
