LG Electronics introduces a new projector, **Minibeam Ultra Short-Throw (UST)**, capable of projecting a 100-inch image on a screen or wall from only 38 centimeters away.

At under two kilograms, the projector (model **PF1000U**) is transportable and easy to set up in any room of the house. Able to display Full HD 1920 x 1080 resolution and brightness of 1000 lumens, the Minibeam UST picture quality is enhanced by its LG Triple XD Engine.

The projector employs a self-emitting RGB LED illumination system and while running quietly at only 21dB in Eco Mode.

With its Four Corner Keystone function, viewers can easily eliminate distortion even when the projector isn't perfectly aligned with the screen. The Minibeam UST can also connect via Bluetooth to sound bars, portable speakers and wireless earphones for an immersive audio experience. The projector also comes equipped with a TV tuner as well as USB and HDMI inputs.
