---

**BenQ**, the global No.1 DLP brand, introduces **i500**, a device that combines wireless streaming apps, short-throw LED projection and integrated audio to deliver big-screen entertainment in limited spaces.

"It's never been easier to equip your apartment with larger-than-life entertainment," says Conway Lee, President of BenQ Corporation. "Simply turn on the i500 and you're ready to stream videos and music via wireless LAN without connecting to anything else."

BenQ i500 LED smart projector comes ready out-of-the-box with popular stream services and apps such as *Youtube by KODI*, *Spotify*, *Vimeo*, *dailymotion*, *YuppTV*, *Aptoid*, *Arte*. Plus much more apps to stream programming of any genre, ranging from movies, TV shows, news, sports, education and cartoons. With the available game pad and controllers, i500 unleashes a universe of heart-pounding games including action/adventure, strategy, role-playing, even first-person shooters.

i500 does all of this via wireless LAN with no other connections required, it can even play video or music content from a USB stick or display Excel, Word, or PowerPoint documents without a PC.

From as close as 1 meter from the screen, i500's short-throw projection delivers 80" of panoramic entertainment for supersized movies, shows, apps, and games in the tightest living spaces. Supporting a variety of streaming content formats from HD to Full HD, i500 with its

long-life LED light source can showcases HD videos.

i500 features dual 5Wx2 chambered speakers specially tuned to produce clear voices and rich sound quality without external speaker connections. When i500 is not projecting the i500 has the ability to be a powerful Bluetooth speaker system.

Elegant and lightweight, i500 is designed to enable big-screen entertainment in any room. Its vertical keystone correction eliminates the trapezoid effect when the projector is placed at an indirect angle, enabling placement on a coffee table or a bedroom chair without distortion.

Never requiring lamp replacement, BenQ i500 LED smart projector offers the latest software and streaming apps via OTA (Over-the-Air) live updates to provide years of unlimited hassle-free entertainment for urban lifestyles.
