

BenQ Adds HT2150ST Short Throw Projector

Written by Marco Attard
31. 08. 2016

BenQ launches the HT2150ST-- a single-chip DLP short-throw 1080p projector offering a 100-inch "crystal clear" image from just 1.5m distance, making it ideal for tight spaces.

The DLP chip comes from Texas Instruments and features a 6-segment RGBRGB colour wheel with BrilliantColor technology and 15000:1 contrast ratio. Brightness totals 2200 ANSI lumens, while additional projector features include a .69 short-throw ratio and 1.2X zoom. The display is also optimised for gaming, with micro-second DMD response time providing smooth and quick images.

Audio is included in the shape of a pair of 20W built-in speakers enhanced with CinemaMaster Audio+ technology. Connectivity comes through dual HDMI ports, one of which featuring MHL for the connection of mobile devices.

The HT2150ST ships from September 2016.
