Optoma announces the GT5500-- an ultra short throw 1-chip DLP 1080p projector the company describes as ideal for the large screen viewing of gaming, TV content, movies and sports.

The 0.25:1 ultra short throw projector features 25000:1 contrast ratio and vivid colours, and creates a 100-inch image from just 33cm distance. Brightness reaches 3500 lumens, making it shine even in the ambient light situations of most homes, while connectivity options include dual HDMI, 3D sync and several analog ports.

Audio comes through built-in 16W speaker, and 3D is supported through HDMI 1.4a.

The Optoma GT5500 is available now.
