Epson announces the Home Cinema 1450-- a 3LCD native 1080p (1920 x 1080) 4200 lumen projector aimed at home theatre or home entertainment applications.

It features x2 HDMI ports, x1 MHL 3 port and component video, as well as USB. Also included are 4 different preset colour modes, the ability to watch 2 sources side-by-side at the same time, built-in 16W speaker, wireless streaming via MHL from Roku or Chromecast, and a quick power on/off feature.

“Bright Epson Home Cinema projectors take relaxing at home with friends to the next level – from watching life-size athletes take on rivals to playing the latest console game,” the company says. “The Home Cinema 1450 delivers an ultra-brilliant image, even in the living room with the lights on. Just plug the Home Cinema 1450 into a streaming or gaming device to transform it into a massive, vivid display for hours of entertainment.”

The Home Cinema 1450 is available from April 2017.
