Screen Excellence presents a retractable screen option-- the RM2T, offering the same performance as the Elightor Neo-S acoustically transparent projection surface.

Available in widths up to 3.56m, the RM2T subtly compliments the decor of the room when not in use, yet swiftly and silently drops into position when required. Thus it makes an ideal solution for concealing any trace of retractable technology.

Meanwhile the Enlightor Neo-S provides enhanced contrast and dynamic range, and dues not require total darkness in order to provide a vibrant image. It features a woven synthetic flame-retardant fabric able to handle 4K resolution images and HDR, with enhanced dynamic range, 0.95 gain and constant acoustic insertion loss (
