Elite Screens presents the DIY Pro Dual, an outdoor projector screen range engineered for portability and easy setup able to produce a bright, clear image on both sides of the material with either a front- or rear-projection display.

The design includes professional-grade matte black masking borders Elite claims improve visual contrast while absorbing the overshoot of projected light. It has an 0.8 gain with a 150-degree viewing angle on both sides, and is 4K and 8K ready. Further features include rust-resistant metal grommets, a canvas carrying pouch, and rope and bungee cords to provide adequate tension.

The screen is available in 16:9 aspect ratio in 3 sizes, 96-, 123- and 251-inch.
