Elesgo proposes an elegant solution for mounting a flat screen: add a wall. Cinewall is a wall-on-wall measuring 1.92 x 1.92m.

It fits into every room and allows for simple flat screen TV mounting. The company says installers can easily adjust the product's height and width, according to the install's specifications. Different appliances can also be mounted exactly as required.

The base model contains a two-part TV holder (loading up to 60 kg), with an aluminum closure and fastening rail.
