Vivitek launches the H1086-3D at CEDIA 2011-- a home theatre projector converting standard 2D DVD and Blu-ray content into 3D without the need for an external box.

It supports HD video at 50/60Hz and 1080p 24Hz 3D content, with 2000 lumens of brightness, 5000:1 contrast ratio and 2:35:1 widescreen support.

Connectivity comes through HDMI, VGA, S-Video, Composite, RS-232 and 12v trigger, and it features DLP, BrilliantColor and DLP link technologies for brighter digital images and additional 3D support for PCs.
