ViewSonic unveils its new LED projector line, the PLED-W200 and PLED-W500. Both ultra portable and energy-efficient, the projectors feature miniature form factors (pico projectors) and 20,000-hour long-life LED light source.

They are both 3D-ready with 120Hz frame rates, offer WXGA (1280x800) resolution and 500 lumens (not ANSI) brightness, and include HDMI and VGA ports, plus USB with 1GB of internal memory for computer-less presentations.

Viewsonic is already offering the PLED-W500 in Europe and “watching with interest and evaluating channel response” to the PLED-W200.
