When you're on site and don't have access to a PC or laptop...now Draper offers a mobile tool kit of web tools for smartphone users.

Draper's mobile toolkit includes searchable document libraries for Draper projection screens, projector lifts and window shades for quick reference..

Also available for smartphones are assembly map tools for Draper's **StageScreen** and **FocalPoint** projection screens. The assembly map tools allow you to figure out which pieces go where to build any size of Draper's popular modular screens.
