Hi-fi specialist Monitor Audio acquires Blok, an audio furniture manufacturer Monitor Audio has often partnered with in order to showcase Roksan products and loudspeakers.

Financial details of the deal are not available.

Established in 2003, Blok is a well-respected manufacturer of hi-fi stands designed at its HQ in Saffron Walden, Essex. The iconic STAX range combines minimalist lines with AV performance, making it popular with audio enthusiasts. The acquisition follows the launch of the Monitor Audio Gold series of loudspeakers, as well as the continued growth of the Custom Install range.

The two companies say the synergy between brands should create "exciting possibilities" for Monitor Audio, Roksan, Blok and their customers.
