

Home Technology Event Wants to Educate

Written by Marco Attard
17. 05. 2011

CEDIA plans 4 days' worth of seminars and courses at **Home Technology Event 2011**, covering what it says are all career paths within the installation sector-- from the newbie looking for technical tips to the veteran wanting business advice.

Available at CEDIA's website is a handy seminar guide, with guides to all courses and debates-- including 20 new for this year.

Installers will also be able to relive their school days even further by sitting for CEDIA certification exams at the show itself-- for Designer Level 1 and EST (Electronics Systems Technician 2).

CEDIA also offers price bundles with its "Passport for Education" scheme for technical courses, while a "Business Strategy Passport" allows access to all business courses.

This year's new courses include:

- Commoditisation: From Threat to Opportunity
- Cash Flow Strategies To Boost Your Bottom Line
- Project Management For Profitability
- The Art of Project Documentation

Home Technology Event Wants to Educate

Written by Marco Attard
17. 05. 2011
