Audio/video solutions maker WyreStorm adds German distributor Vivateq as European sales partner handling WyreStorm products across Austria, Poland, Switzerland and Germany.

The announcement follows similar deals with Belgian distributor Alelek Group and French distributor Sidev Display Systems.

Vivateq offers a variety of custom install products for both residential and commercial markets, as well as training and technical support. It works with system integrators, AV retail stores, electricians and building technology companies.

"We are delighted to sign an agreement with Vivateq to represent WyreStorm in Germany, Austria, Switzerland and Poland," WyreStorm says. "They have a strong reputation and complementary brands and we look forward to working together to develop our mutual business in these markets."
