

Channel Vision Releases Intercom Amplifier

Written by Marco Attard
11. 06. 2013

Channel Vision launches the TE-AMP kit-- a front door intercom amplifier kit boosting volume and clarity on the DP and IU series front door intercom stations.

An easy upgrade, the TE-AMP kit can be installed on existing Channel Vision front door intercom stations in the field or added to your next DP or IU series station order.

The kit includes amplifier board, Philips screws, washers, stand-offs, nuts and 2x28 AWG wire.
