Channel Vision launches the 6532, a "vandal-proof" mini IP dome camera with a 1.3MP CMOS sensor (records 1280x800 resolution footage at 30fps) and Power over Ethernet (PoE) capability.

It is IP66 rated for outdoor conditions, and further features include digital wide dynamic range, triple streaming and digital noise reduction.

Customers can control and view the 6532 from anywhere using either internet browser or Channel Vision iOS/Android mobile device apps. The company also offers a CMS software allowing the simultaneous management of up to 36 cameras.
