Atomoo
Unify · Simplify · Fortify

Atomoo brings to CEDIA its new Managed Home solution, a real-time monitoring product. It polls the system every few minutes so it lets you actively monitor and manage a client's network to be sure devices, such as computers, control systems, printers, firewalls, internet access and security are operating properly.

 Acting as a Managed Service Provider, Atomoo offers training and personalized business coaching, and site-based subscription pricing.

 OK, it's for USA market now but the concept seems to be a good one.
